PROFESSIONAL SUMMARY

Blockchain & Full-Stack Developer with 7+ years of engineering experience and a focused track record in Web3 development across **Ethereum** and **Sui**. Built and shipped four decentralized applications — spanning on-chain voting, social-impact funding (deployed to Ethereum mainnet), decentralized storage on Sui with Walrus, and IPFS-backed notes — using Solidity, Sui Move, Hardhat, Wagmi, and Web3.js. Backed by production depth in Python, TypeScript, and cloud-native infrastructure across government-scale systems serving 1M+ users.
