PROFESSIONAL SUMMARY

Native Bahasa Indonesia speaker and senior software engineer with 7+ years delivering AI/NLP systems across Indonesian government and diplomatic institutions. Built and evaluated LLM agent outputs in Bahasa Indonesia (KJRI Dubai AI Chatbot), designed large-scale data pipelines, and enforced data quality standards across 8 production systems serving 1M+ citizens. ISO 27001 Lead Auditor — trained in systematic error identification, guideline adherence, and structured quality reporting. Uniquely positioned to bridge deep AI/NLP engineering knowledge with rigorous linguistic data evaluation.

LANGUAGE & LINGUISTIC DATA PROFILE

- **Bahasa Indonesia — Native Speaker**, currently residing in Jakarta, Indonesia. English — B2 Professional Working Proficiency.
- Authored and reviewed thousands of lines of Indonesian-language content: consular service prompts, LLM chatbot responses, procurement specifications (KAK/TOR), and government policy documents — with attention to grammatical correctness, clarity, and cultural appropriateness.
- Built and iteratively evaluated the **AI Chatbot KJRI Dubai**: designed Bahasa Indonesia prompts, assessed LLM response quality for semantic accuracy, appropriate formal register, and factual correctness — directly analogous to AI linguistic data annotation work.
- ISO 27001 Lead Auditor discipline: systematic issue identification, categorization, root-cause analysis, and structured reporting — transferable to linguistic error classification and QA workflows.

RELEVANT SKILLS

AI & NLP: LLM agent evaluation, prompt engineering, Google ADK, LangChain, LangGraph, Claude API, MLOps, OpenCV

Data & QA: Pandas, NumPy, dbt, Airflow, ODK Central, PostgreSQL, MySQL — pipeline design & quality control

Audit & Compliance: ISO 27001 Lead Auditor, RBAC, audit logging, structured error reporting, policy documentation (KAK/TOR)

Engineering: Python (Advanced), TypeScript/JavaScript, PHP, SQL; Django, FastAPI, Flask, Laravel, CodeIgniter, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

- Senior Full-Stack Engineer & Lead Consultant — Syamil Solusindo Semesta** 2022 – Present
- Leading development of **AI Chatbot KJRI Dubai** (Google ADK, FastAPI, LangChain) — designed and evaluated Bahasa Indonesia LLM outputs for accuracy, register, and cultural appropriateness in a high-stakes consular context; among Indonesia's first LLM-agent deployments in diplomatic infrastructure
 - Authored all Bahasa Indonesia content for chatbot responses, onboarding flows, and user-facing consular service text across 8 applications — ensuring native fluency, correct formal register, and compliance with Ministry of

Foreign Affairs guidelines

- Implemented ISO 27001 data compliance across 8 systems; produced detailed quality assurance and audit reports for 7 Indonesian diplomatic missions (Malaysia and UAE)
- Managed 10+ government procurement KAK/TOR documents — structured Indonesian-language technical writing reviewed by senior government officials for linguistic and semantic accuracy

Research Engineer (Perekayasa) — BRIN — National Research and Innovation Agency 2022 – 2025

- Designed data pipelines for national policy research — collected, cleaned, and validated large-scale Indonesian government datasets, identifying and categorizing data quality issues with structured reporting
- Authored 10+ KAK/TOR procurement specifications in Bahasa Indonesia, requiring precise technical writing reviewed by government auditors for linguistic accuracy and semantic clarity
- Built MLOps infrastructure (Kubernetes, Kubeflow, TensorFlow, MLflow) supporting AI model training and quality evaluation across multiple national research centers

AI/ML Engineer — BPPT — Agency for Assessment and Application of Technology 2021 – 2022

- Developed and benchmarked face recognition system (Python, TensorFlow, ResNet) — systematic model evaluation achieving 92% accuracy; designed error categorization and quality reporting criteria for national government deployment
- Produced technical assessment reports in Bahasa Indonesia for Indonesia's national technology evaluation agency

Software Engineer — KBRI Malaysia — Embassy of the Republic of Indonesia, Kuala Lumpur 2019 – 2021

- Built consular service applications for Indonesian citizens (WNI) in Malaysia — all user-facing content in formal Bahasa Indonesia, reviewed for appropriateness, grammatical accuracy, and clarity
- Bridged communication between Indonesian diplomatic staff and technical teams; required precise bilingual (Bahasa Indonesia/English) documentation and correspondence

SELECTED PROJECTS

AI Chatbot KJRI Dubai — LLM Consular Assistant 2025 – 2026

- Designed and evaluated Bahasa Indonesia LLM outputs for semantic accuracy, formal register, and cultural appropriateness; iterative quality evaluation loop was central to development
- Stack: Google ADK, FastAPI, PostgreSQL, LangChain

Protkons — National Consular Protection Platform 2022 – Present

- Serving 1M+ registered WNI across 6 Malaysian missions — all Indonesian-language UI, forms, notifications, and official document templates authored and reviewed for linguistic correctness and official tone
- Stack: PHP, CodeIgniter, MySQL, Docker

EDUCATION

M.Kom — Information Systems

Institut Teknologi Sepuluh Nopember (ITS) Surabaya | 2015 – 2018 | GPA 3.38

S.Kom — Information Systems

Universitas Jember | 2010 – 2015 | GPA 3.34

CERTIFICATIONS

Lead Auditor ISO 27001:2013 — Information Security Management (2019)

KodingDeepDive x BwAI — Architect AI Agent Systems with Agent-Database Lifecycle (2025)

Langchain Academy — Deep Agent with LangGraph (2025)

Digitalent Big Data — Kementerian Kominfo (2022)

DigitalOcean Kubernetes Challenge (2023)
