SUMMARY

IT Project and Contract Management professional with 7+ years of experience leading enterprise-scale IT procurement, application development, and vendor management across Indonesian government agencies and diplomatic institutions. Proven track record authoring 10+ procurement proposals, Rencana Anggaran Biaya (RAB), and full procurement contracts for IT application development services across 7 overseas diplomatic missions, alongside 10+ Kerangka Acuan Kerja (KAK) for national policy research projects at BRIN. ISO 27001 Lead Auditor certified, with strong capability in vendor coordination, milestone monitoring, compliance management, and requirements analysis in high-stakes government environments. Experienced coordinating with multiple government ministries and agencies (K/L) to align technical scope with institutional objectives.

EXPERIENCE

Syamil Solusindo Semesta

Project Manager & Lead IT Consultant | Remote / Jakarta | Jan 2022 – Present

Led end-to-end IT project management, procurement planning, and application development for 8 mission-critical systems across 7 Indonesian diplomatic missions overseas, serving 500+ daily active users and 1M+ registered WNI.

- Prepared 10+ procurement proposals and Budget Plans (RAB) for IT application development services across Indonesian diplomatic missions, covering full procurement lifecycle from initial needs assessment through contract finalization.
- Drafted and finalized procurement contracts for IT application development services, ensuring alignment with government procurement standards, technical scope of work, and agreed deliverables.

- Conducted structured application requirements analysis (analisis kebutuhan) for each procurement cycle, defining technical scope, deliverables, milestones, and acceptance criteria prior to vendor engagement and contract issuance.
- Monitored project delivery milestones across 7 missions, coordinating between internal development teams and institutional stakeholders to ensure on-time completion of deliverables per contractual obligations.
- Designed and deployed a suite of 8 applications across 7 diplomatic missions, maintaining 99.9% uptime and serving a registered base of over one million Indonesian citizens.
- Built consular service and queue management systems for KJRI Dubai using Next.js, Django REST Framework, and MySQL, streamlining citizen-facing service delivery.
- Built a production-ready AI chatbot for consular services using Google Agent Development Kit (ADK), FastAPI, and PostgreSQL — one of the first LLM-agent deployments in Indonesian diplomatic infrastructure.
- Implemented audit logging, RBAC, and AES-256 encryption for all applications handling classified diplomatic and citizen data, in compliance with ISO 27001 standards.
- Containerized all mission applications using Docker on dedicated on-premise servers, reducing maintenance downtime by 40% and achieving 99.9% uptime.

Key Achievements

1. Delivered 10+ end-to-end IT procurement cycles — from proposal and RAB through contract execution — for application development at Indonesian diplomatic missions abroad.
2. Protkons platform deployed across 6 Malaysian missions serves over one million registered WNI with consular protection and welfare services.
3. Achieved consistent 99.9% uptime across all 7 diplomatic mission deployments through Docker-based containerization and proactive infrastructure management.

Badan Riset dan Inovasi Nasional (BRIN)

Perekayasa (Research Engineer) | Jakarta | 2022 – 2025

Contributed to national policy research by authoring KAK, building data tools, automation pipelines, and analytical systems to support evidence-based policymaking across multiple government ministries.

- Authored 10+ Kerangka Acuan Kerja (KAK/TOR) over 4 years for policy research activities, defining activity scope, objectives, methodologies, and deliverables in coordination with relevant government ministries and agencies (K/L).
- Coordinated with BRIN researchers and officials from multiple ministries to bridge technical implementation requirements and policy research scope, ensuring KAK documents aligned with institutional needs and budget planning cycles.
- Developed automated web scraping tools using Python (BeautifulSoup, Selenium) to collect 10,000+ rows of structured data, significantly reducing manual effort for research teams.
- Transformed raw datasets into actionable insights for policy memoranda (naskah kebijakan) submitted to multiple government ministries, using Python (Pandas, Matplotlib, Seaborn) and Excel.
- Built an automated speech-to-text transcription tool in Python that reduced manual transcription time for field recordings and qualitative research interviews.
- Developed a web app integrating the BPS Open API to allow researchers to programmatically search, filter, and retrieve national statistical data.

Key Achievements

1. Authored 10+ KAK documents directly supporting national research project planning and budget coordination with multiple Indonesian government ministries and agencies.
2. Data analysis outputs directly contributed to policy memoranda submitted to multiple Indonesian government ministries.
3. BPS API integration app adopted as internal research infrastructure, enabling programmatic access to national statistics for BRIN research teams.

Upwork (Freelance)

Full Stack Developer & DevOps Engineer | Remote | 2023 – Present

- Deployed and configured ODK Central instances on DigitalOcean using Docker Compose for 2 international clients, enabling reliable mobile data collection for field research.
- Contributed to a medical data collection project for a hospital in Bandung, preparing ODK Central infrastructure as part of a health survey initiative led by PCNU Germany.

- Provided clear setup documentation and post-deployment support so clients could independently manage their ODK Central environments.

Badan Pengkajian dan Penerapan Teknologi (BPPT)

AI/ML Engineer | Jakarta | 2021 – 2022

- Developed a production-grade face recognition system using Python, TensorFlow, and ResNet achieving 92% accuracy, deployed as an attendance application currently in active use by a government ministry.
- Built a native Android application integrated with the face recognition backend API, enabling real-time face-based attendance capture in the field.
- Co-built an end-to-end MLOps infrastructure from server setup to CI/CD pipelines using Kubernetes, enabling automated model training, versioning, and deployment.
- Conducted hands-on training for 20+ research engineers on operating the MLOps infrastructure, accelerating team adoption of containerized ML workflows.

Embassy of Indonesia in Kuala Lumpur (KBRI)

Software Engineer | Malaysia | 2019 – 2021

- Built and deployed 3 applications (Numbering System, Queue Management System, COVID-19 Aid Distribution System) in ~14 months using Django and MySQL.
- Managed transmission of ~50 diplomatic messages/telegrams daily and provided IT support for embassy staff resolving system and network issues.
- Coordinated with external vendors and managed on-premise server contracts, maintaining 10+ embassy IT systems and networks with 99% uptime.
- Digitized manual workflows, reducing document processing time by 30% and improving service delivery for embassy staff and citizens.

Universitas Nahdlatul Ulama

Lecturer, Computer Science | Surabaya | 2018 – 2019

- Taught 24 credit hours weekly across core CS courses: Algorithms, Data Structures, Web Development, and Mobile Programming.
- Mentored 100+ students per semester with curriculum aligned to industry standards.

KEY PROJECTS

Protkons — National-Scale Consular Protection Platform | 2022–Present

Multi-mission consular protection system deployed across 6 Indonesian missions in Malaysia, serving 1M+ registered WNI. Managed full project lifecycle including procurement, contract coordination, vendor management, and technical delivery. Handles citizen registration, legal protection, welfare tracking, and case escalation.

Tech: PHP, CodeIgniter, MySQL, Docker

AI-Powered Consular Chatbot — KJRI Dubai | In Development, 2025–2026

Building a production-ready AI agent for consular services using Google ADK, Python, FastAPI, and PostgreSQL. One of the first LLM-agent deployments in Indonesian government diplomatic infrastructure.

Tech: Google ADK, Python, FastAPI, PostgreSQL, Docker

Centralized Service Data Dashboard | 2023

Unified data intelligence platform aggregating service metrics from 6 Indonesian missions in Malaysia into a single dashboard for leadership decision-making and data-driven policy.

Tech: Laravel, PostgreSQL, Docker, Nginx

MLOps Infrastructure for National Research | 2022

Architected shared machine learning infrastructure using Kubernetes and Kubeflow, adopted by multiple research centers for deploying computer vision models at scale.

Tech: Kubernetes, Docker, Python, TensorFlow, MLflow

AI-Powered Data Pipeline Automation | 2025

Built a working prototype of intelligent data processing workflows using Claude AI API and n8n automation platform. Explored AI-driven data validation and automated reporting for research datasets.

Tech: Python, Claude AI, n8n, Docker, PostgreSQL

EDUCATION

Master of Computer (M.Kom), Information Systems | 2015 – 2018

Institut Teknologi Sepuluh Nopember (ITS) Surabaya | GPA: 3.38 / 4.00

Bachelor of Computer (S.Kom), Information Systems | 2010 – 2015

Universitas Jember | GPA: 3.34 / 4.00

SKILLS

- **Project & Contract Management:** Procurement Planning, RAB & Budget Management, KAK/TOR Authoring, Contract Drafting, Vendor Management, Milestone Monitoring, Stakeholder Coordination
- **Cloud & Infrastructure:** Kubernetes (K8s), Docker, AWS, CI/CD Pipelines, DigitalOcean, Linux Administration, Nginx
- **Programming Languages:** Python (Advanced), TypeScript/JavaScript, Go, SQL, PHP
- **Backend & Frameworks:** Django REST Framework, FastAPI, Flask, Laravel, CodeIgniter, Node.js, Next.js, React
- **Data Engineering:** Pandas, NumPy, dbt, dlt, Airflow, Data Warehousing, MySQL, PostgreSQL, ODK Central
- **AI & Machine Learning:** Google Agent Development Kit (ADK), LangChain, MLOps, Computer Vision (OpenCV), n8n Automation
- **Security & Compliance:** ISO 27001 Lead Auditor Certified, RBAC Implementation, AES-256 Encryption, HIPAA-aligned data handling
- **Tools & Collaboration:** Git, GitHub Actions, Postman, Figma, Jira, Slack, Agile/Scrum

CERTIFICATIONS & TRAINING

- KodingDeepDive x BwAI Jakarta — Architect AI Agent Systems with Agent-Database Lifecycle (2025)
- Langchain Academy: Deep Agent with Langgraph (2025)
- SUI Blockchain Bootcamp (2025)
- Blockchain Developer (Solidity) — BlockDevId (2025)
- Apple Academy Developer (2024)
- DigitalOcean Kubernetes Challenge (2023)
- Digitalent Big Data — Ministry of Communication and Information Technology (2022)
- **Lead Auditor ISO 27001:2013 — Information Security Management (2019)**

ADDITIONAL INFORMATION

- **Languages:** English B2 Upper Intermediate (Professional Working Proficiency), Bahasa Indonesia (Native)
- **Work Experience Scope:** Government agencies (BRIN, BPPT, KBRI), diplomatic missions (7 overseas missions), and private sector clients
- **Institutional Coordination:** Experienced collaborating with multiple Indonesian government ministries and agencies (K/L) for project planning, KAK preparation, and policy research
